

COURSE INFORMATION SHEET/SYLLABUS  
Tuesday/Thursday section

**Instructor:** S. Vincent Lloyd

**Phone:** 310-660-3593 x3246

**Office hours:** see instructor website.

**Office location:** Physics 117H, just north of the Humanities Building.

**email:** svlloyd@elcamino.edu

**website:** www.sabik.org

**twitter:** @eccobservatory

**Dates:** Tuesdays & Thursdays, August 27 – December 12

**Holidays:** Thursday November 28 (Thanksgiving)

### Course Description

Greetings, Earthlings! You are about to embark on a journey to our neighbor worlds in the cosmos! Astronomy 20 is an introductory-level course which concentrates on the foundation of modern astronomy and the study of the major worlds of the Solar System. The course has no astronomy, physics, or math prerequisites; however, knowledge of high school pre-algebra is sometimes helpful.

Credit for Astronomy 20 is fully transferable to the California State University system. Credit is fully transferable to the U.C. system unless you also take Astronomy 25 (see a counselor if you have taken Astro 25 and are planning to transfer to a U.C.).

This is a 3 unit course. That means that students are given credit for 9 hours of work every week. (Each unit represents three hours of work.)

### Course Objectives

The objective of Astronomy 20 is to give you an insight into what makes the Earth a special place for life. During the course, the student will learn how to:

1. Explain the difference between science and “pseudo-science.”
2. Predict the phase of the Moon that would be seen in the sky, given the positions of the Earth, the Sun, the Moon, and the observer.
3. Explain the causes of seasonal variations in the length of the day, the direction of sunrise and sunset, and the amount of solar heating.
4. Discuss the Copernican Revolution, the controversy over whether the Sun or the Earth is the center of the Solar System.
5. Compare the major planets and moons of the Solar System.
6. Explain how the age of the Solar System is determined.
7. Explain how the forces of impacts, volcanism, tectonics, and erosion shape the surface of planets.
8. Compare the composition and properties of the atmospheres of the planets.
9. Compare the climates of the inner planets and discuss why they are different.
10. Contrast the terrestrial planets from the gas giants, ice giants, and icy moons.
11. Discuss the conditions necessary for life on a planet.
12. Sketch how the planets were formed.

## Student Learning Objectives

1. Students will be able to recognize the elements of the Scientific Method in the discussion of a scientific problem.
2. Students will be able to explain the causes of seasonal variations in the length of the day, direction of sunrise and sunset, and the amount of solar heating on the Earth.
3. Students will be able to describe the modern theory of the origin of the planets and discuss the evidence that supports the theory.

## Required textbooks

*Lecture Tutorials for Introductory Astronomy* by Prather. **BUY THIS BOOK – DON'T RENT IT!**  
You will be writing in this booklet.  
*Lloyd's Astronomy Reader* by Lloyd (available in the El Camino Bookstore).  
On-line textbook: [www.teachastronomy.com](http://www.teachastronomy.com) (free).

Additional materials: 4 Scantron No. **883** forms and 4 Scantron **882** forms, pack of 100 3x5-inch index cards, pencils, ruler, & protractor.

## Attendance and Withdrawal

The College expects students to attend every class (except in case of illness or emergency). Keep in mind that while coming to class by itself will not earn you a passing grade, not coming to class makes it exceedingly difficult to pass the course. If you can't make it to class, check the instructor's website to see what you have missed. Contact the instructor if you miss two or more classes in a row.

The instructor may drop you from the course if you miss more than 3 classes before the last day to drop. However, he might not drop you if he doesn't notice that you're not in class. If you decide not to complete the course, it is your responsibility to drop the course on-line (if it is before the last day to drop). Otherwise, you may end up with an "F" for this course on your transcript.

### Important dates

Last day to drop without a "W"

**Friday, September 6**

Last day to drop with a "W"

**Friday, November 15**

A "W" (withdrawal) means that you attempted the course but did not complete it; it doesn't affect your Grade Point Average (GPA), but a large number of Ws will cause you to be put on academic probation. If you stop attending after the "W" date you will probably receive an "F" for the course. If an emergency comes up at that time, ask the instructor for an I (incomplete) (see page 6).

## Assignments, Exams, and Grades

### Speech.

With a partner, you will make a 2-minute speech about a small member of the Solar System, a moon, asteroid, comet, or Trans-Neptunian Object. This is a 2-person speech; you **must** have a partner. First you will prepare an outline and bring it to the instructor during office hour. After your outline is approved, you will be ready for your speech. A form for the outline is attached. The speech is worth **50** points (8% of your course grade).

If you or your partner are absent on the day your talk is scheduled, you will be rescheduled for the next available day, if one is open. If you give your talk on the scheduled day, you will be awarded bonus points. The number of bonus points equals the number of whole weeks left in the semester.

Note: The use of notes is **not** allowed during the talk.

### Projects

You will do two homework projects involving observation of the Sun and the Moon. Details can be found on the website. You can do the project by yourself or with one partner, but no more than two people can work together. If you choose to work with a partner, be aware that both partners are responsible for turning the project in on time. Do not copy from a third person or let someone else copy your results.

Each project is worth **50** points. Penalty for late projects: 5 points per school day. The project should be stamped every week. Late projects will be accepted only if they have at least one stamp.

Note: Each project is worth 8% of your grade!

NOT DOING THE PROJECTS WILL LOWER YOUR COURSE GRADE AT LEAST ONE FULL GRADE.

### Homework

There will be 4 Problem Sets (worth **15** points each).

Two students can do the **Problem Sets** together, but no more than two. Do not copy from a third person or let someone else copy your results.

Late homework will not be accepted after the graded homework has been returned.

Note: The homework is 10% of your grade.

NOT DOING THE HOMEWORK WILL LIKELY LOWER YOUR COURSE GRADE ONE FULL GRADE.

### Quizzes

There will be 4 quizzes worth **30** points each. There will be a quiz or exam **every other Thursday** (except for holidays). See the schedule (page 7) for the quiz dates. Bring a **Scantron 882** or **883** for each quiz.

There are **no** make-ups for quizzes; however, the lowest quiz score will be dropped, so you can miss one quiz without penalty.

If you miss a second quiz, you can make up the points by a museum visit (see next page).

### Exams

There will be 4 exams worth **100** points each (together making up 50% of your course grade). See the schedule (page 7) for the exam dates. Bring a Scantron No. **883** for each exam.

During the exam, you are allowed to use notes written on **one** standard 3x5-inch index card, written **in your own hand**. It has to be a **pre-cut** file card or index card; pieces of paper you cut out yourself are not allowed.

The lowest exam score will be dropped, so there is no penalty for missing one exam. (Exception: any exam in which cheating occurs will automatically get a 0 which will not be dropped.)

If an emergency causes you to miss a second exam, you may, at the instructor's discretion, be allowed to take an **oral** make-up exam. No notes are allowed during the oral exam. The oral exam must be taken before the next regular exam date.

**Study guides:** You will be given study guides that will detail what material you are responsible for on the exams. If you can thoroughly explain all the concepts on the study guide, you should do well on the exam.

If you have a disability that affects your ability to take exams, contact the Special Resource Center well ahead of the exam date to discuss special test-taking arrangements.

### **Extra credit and quiz make-up**

You may go to **one** of the following two science museums for up to 30 points extra credit. In addition, you may also make a museum visit to make up the points for a second missed quiz.

#### **1) Griffith Observatory**

Location: Griffith Park; go up Vermont Ave. to the end. Parking is \$6-8 an hour. Parking is tight on weekends. Public transportation: DASH Observatory bus (50¢) leaves from Vermont/Sunset station on the Metro Red Line. You can get to the Red Line by taking the Silver Line bus and get off at 7<sup>th</sup> St.

Website: [griffithobservatory.org](http://griffithobservatory.org).

Hours: Tuesday-Friday: 12 to 10 pm. Saturday & Sunday: 10am to 10 pm.

Closed Mondays. Closed Thanksgiving Day (also Christmas day).

You will need to get a proof of attendance with a **date** on it: Options:

- (1) Get a proof of attendance from one of the friendly staff.
- (2) Buy a planetarium show ticket (\$5 for students).
- (3) Buy something at the store or the cafe.

A BROCHURE IS NOT ENOUGH. A PHOTO IS NOT ENOUGH.

#### **2) California ScienCenter**

Location: Exposition Park near the Coliseum. Open daily 10-5.

The museum is free but parking is \$12 (cash only). Be aware of heavy traffic on football days. Public transportation: the museum is a short walk from the 37th St/USC stop on the Metro Silver Line.

Website: [www.californiasciencecenter.org](http://www.californiasciencecenter.org).

Be sure to get a proof of attendance with a **date** on it. Options:

- (1) Buy a ticket for the Space Shuttle (\$3 online).
- (2) Make a small donation and get a receipt.
- (3) Buy something at the store.
- (4) Buy a ticket for the IMAX theater or a special exhibit.

A "SCIENCE PASSPORT" IS NOT ENOUGH. A BROCHURE IS NOT ENOUGH.  
A PHOTO IS NOT ENOUGH. A PARKING PERMIT ISN'T ENOUGH, EITHER.

#### **Rules for all extra credit or make-up credit**

1) You can make a visit to make up the points for a second missed quiz. In addition, you can make **one** visit for extra credit to either Griffith Observatory or the California Science Center.

2) Write a **1-page report** and explain 15 things you learned about **science or spaceflight**. This is an individual report; everyone must write their own report in their own words. Be specific: tell what you learned, not what you learned about.

Acceptable: *I learned that the Apollo command module carried three men to the Moon.*

Not acceptable: *I learned about the Apollo program.*

You get 2 points for every specific fact that you describe in your report, up to a maximum of 30 points.

3) Attach proof of attendance with a date on it.

A BROCHURE, PARKING PERMIT, OR PHOTO IS NOT SUFFICIENT.

4) Turn in your report no later than the end of week 15.

"Turning it in" means printing it out and handing it to the instructor (or leaving it on his door); email is NOT enough.

NO EXCEPTIONS—not for illness, computer malfunction, natural disaster, or alien abduction!

<b>Grading Scale</b>		<b>Tentative grading scale</b>		
<u>Grade points</u>				
4 Problem sets	60	>92%	A	≥552 pts
2 Projects	100	88 – 92%	B or A	528 – 551 pts
Speech	50	77 – 88%	B	462 – 551 pts
3 of 4 quizzes	90	73 – 77%	C or B	438 – 461 pts
3 of 4 exams	300	62 – 73%	C	372 – 437 pts
Total	600	58% – 62%	D or C	348 – 371 pts
		50% – 58%	D	300 – 347 pts
		<50%	F	<300 pts

The precise grade breakpoints will be determined at the end of the semester on the basis of the points distribution, but will be within the ranges shown above. This means that in order to guarantee an "A," for example, you need to get at least 92% or 552 points.

<b>GRADE RECORD</b>	<b>Points</b>	<b>Cumulative Points</b>	<b>Possible Points</b>	<b>Cumulative Possible Pts</b>
Quiz 1	_____	_____	30	30
Problem set 1	_____	_____	15	45
Exam 1	_____	_____	100	145
Quiz 2	_____	_____	30	175
Problem set 2	_____	_____	15	190
Exam 2	_____	_____	100	290
Project 1	_____	_____	50	340
Quiz 3	_____	_____	30	370
Problem set 3	_____	_____	15	385
Exam 3	_____	_____	100	485
Project 2	_____	_____	50	535
Quiz 4	_____	_____	30	565
Less lowest quiz	_____	_____	30	535
Problem set 4	_____	_____	15	550
Exam 4	_____	_____	100	650
Less lowest exam	_____	_____	100	550
Speech	_____	_____	50	600
Extra credit	_____	_____	30	600

**Grading Policies.**

The college's standard grading policies can be found at:

[www.elcamino.edu/admissions/grading.asp](http://www.elcamino.edu/admissions/grading.asp)

This page contains information on units, grade points, withdrawal, incompletes, and grade change procedures.

## **Class Policies**

**Manners.** Treat other students and the instructor with respect and courtesy. Do not talk while another student or the instructor is speaking.

**Food and drink.** Please do not bring drinks other than water into the Planetarium; coffee and soda spills will stain the carpet. Do not eat during class.

**Time deadlines.** Assignments are considered late if they are given to the instructor **after the end of his last office hour** on the week that they are due. An assignment has to be handed to the instructor during class or office hour or clipped to his office door. Do not drop off assignments in the division office. emailed assignments are not accepted. Late homework is not accepted after the graded homework has been returned. Observing projects turned in late are subject to a 10% per day penalty (not counting weekends or holidays).

**Incompletes in the course.** An "incomplete" grade will be given only when the student is prevented from finishing the course on time because of an extraordinary, unexpected circumstance. Students receiving an incomplete must be doing passing work up to that point. If such an occurrence happens, it is the student's responsibility to contact the instructor immediately to explain the situation and make arrangements to complete the course.

**Academic integrity.** The following acts are considered dishonest and are not allowed:

1. On homework assignments and projects: copying someone else's work, making up data, or reporting that you saw something that you didn't see. Copying someone else's homework is against the rules in the United States. So is letting someone else copy your work.
2. On exams or quizzes: copying from another student's answer sheet or using notes other than those allowed by the instructor. Letting someone else copy your answers is also unethical.
3. Taking an exam or quiz copy home.

Any quiz or exam during which cheating occurs will automatically get a 0 which will not be dropped.

Students who do any of these actions are subject to disciplinary action.

For a complete list refer to the El Camino College Catalog:

### **Students' Rights and Responsibilities: Policies and Procedures: Definitions**

#### **Recording devices in the classroom**

The use of any recording device during class without the prior consent of the instructor is prohibited, except as necessary to provide reasonable auxiliary aids and academic adjustments to disabled students who present official documentation from the Special Resource Center to the instructor prior to recording. This is to protect privacy and to create a safe classroom environment where all participants can discuss potentially controversial or sensitive subjects freely. If you want to take a photograph or make an audio or video recording, you must get the prior written permission of the instructor. The instructor also may require the verbal and/or written permission of everyone present. Even if a student gets permission to record, the recordings are only for personal use and may not be distributed, posted, published, or shared in any manner. A student who records without instructor permission or distributes any recordings is subject to disciplinary action in accordance with El Camino College District Administrative Procedure 5500 Standards of Student Conduct.

## **Students with disabilities**

El Camino College is dedicated to providing access to education for students with disabilities. For further information, see the El Camino Catalog, Special Resource Center. Students with disabilities should inform the instructor especially if there are medical problems or learning disabilities. Accommodations may be provided as recommended by the Special Resource Center. See [www.elcamino.edu/academics/src/](http://www.elcamino.edu/academics/src/)

### TOPIC SCHEDULE

Week	Date	Topic	Tests
1	8/27	Why learn astronomy?	
	8/29	Bad Astronomy	
2	9/3	Universe overview	
	9/5	Starrise & starset	<b>Quiz 1</b>
3	9/10	Flat Earth Theory	
	9/12	Annual Motion of the Sun: the Zodiac	
4	9/17	Planet Motions	
	9/19		<b>Exam 1</b>
5	9/24	Ptolemy to Copernicus	
	9/26	Galileo	
6	10/1	Kepler's 1st Law	
	10/3	Kepler's 2 & 3d Laws	<b>Quiz 2</b>
7	10/8	The Law of Inertia / Orbital Motion	
	10/10	The Law of Gravity	
8	10/15	Orbits	
	10/17		<b>Exam 2</b>
9	10/22	The Formation of the Planets	
	10/24	Terrestrial Planets	
10	10/29	The Moon	
	10/31	Mercury/ the Tidal Force	<b>Quiz 3</b>
11	11/5	Atmospheres, / Greenhouse Effect	
	11/7	Mars/	
12	11/12	Venus/	
	11/14	<b>Exam 3                      Friday: LAST DAY TO DROP</b>	<b>Exam 3</b>
13	11/19	Earth	
	11/21	The Seasons: Why is it hot in summer?	
14	11/26	Jupiter and Saturn	
	11/28	— HOLIDAY —	
15	12/3	Uranus and Neptune	<b>Quiz 4</b>
	12/5	Solar & Lunar Eclipses	<b>E/C due</b>
16	12/10	Titan, Triton, Pluto & Charon	
	12/12		<b>Exam 4</b>

---

## TIPS FOR SUCCESS IN YOUR ASTRONOMY COURSE

### While you are away from campus

1. Get a student calendar and write in your exam dates and assignment due dates.
2. Set aside a regular time and place to study your astronomy every week. You are expected to spend six hours every week on study and homework.
3. Make college a priority in your life. For example, don't make appointments during class time.
4. Do your homework.
5. Make flash cards to prepare for exams.

### While you are on campus

1. Buy all your Scantron forms the first week so you will have one on test day. Also get a stack of 3x5-inch index cards.
2. Find out where the instructor's office is and when his office hours are.
3. Get to know the tutor. She or he is in the library on the 2nd floor, west end.
4. Form a study group with others in the class.
5. Take an Academic Strategies class, such as Test-Taking Strategies (English 61), Listening and Note-taking Strategies (English 65), or Thinking Skills for College Courses (English 67) or Individualized Academic Strategies (Academic Strategies 1).

### While you are in class

1. Get to class five minutes early and review your notes from last time.
2. Turn off your cellphone. Do student 100%.
3. Take enough notes during class so that at the end of the week you will be able to tell what the lecture was about.
4. Raise your hand when something is not clear. The thing will no doubt be unclear to many others in class. They will be grateful to you.
5. Do the lecture-tutorials completely and conscientiously. See the tutor or visit the instructor during his office hour if you don't understand something.

Thanks to Dave Pierce for suggestions.

*"We are not here to worship what is known, but to question it."*—J. Bronowski

## EXAMPLE: SPEECH OUTLINE

Topic \_\_\_ Dactyl \_\_\_ Outline due \_\_\_\_\_ Speech Date \_\_\_\_\_

Make an outline organized by topic and subtopics. Don't write out complete sentences. Be neat.

I. Introduction: Dactyl is interesting because...

A. *I was one of the first to hear of its discovery.*

II. Middle. Give the basics about your subject: what, where, how big. etc.

A. Classification

1. *Asteroid moon*

B. Location

1. *orbits Ida*

2. *main asteroid belt*

3. *Koronis family – breakup of larger asteroid*

C. Size

1. *about 1 mile*

2. *size of ECC*

D. Orbit

1. *about 50 miles from Ida*

2. *orbital period about 20 hours*

3. *escape speed = jogging speed*

E. Composition

1. *rocky, like stony meteorites*

F. Surface features

1. *covered with craters*

III. Conclusion: Dactyl is important because...

A. *1st asteroid moon*

B. *common phenomenon, due to asteroid collision.*

IV. References

List at least two references with complete URLs.

1. [en.wikipedia.org/wiki/Dactyl\\_%28moon%29#Moon](http://en.wikipedia.org/wiki/Dactyl_%28moon%29#Moon)

2. [www.solarviews.com/eng/ida.htm](http://www.solarviews.com/eng/ida.htm)
